CONSEILS D'ENTRETIEN

MAINTENANCE INSTRUCTIONS

Pour votre confort d'utilisation, les vitrages des parois de douche sont traités avec une protection anticalcaire.

Grâce à ce traitement, l'eau et les salissures adhèrent moins facilement sur le verre. Il est ainsi plus facile et rapide de nettoyer les surfaces vitrées.

Nous recommandons de nettoyer à l'éponge avec des produits classiques de nettoyage non-abrasifs. Vous ne devez pas utiliser de poudre ou de crème abrasives, de détergent chimique, d'alcool trichloréthylène, ou d'éponge abrasive car ils altèrent le traitement de protection anticalcaire.

Rincer abondamment à l'eau claire, essuyer avec un chiffon doux.

The glass panels have been treated with an anti-limescale product to make them easy to keep clean.

Water and grime adhere less easily to the glass.

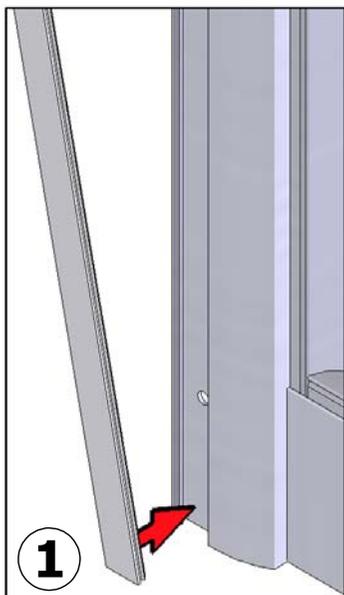

Cleaning the glass panels is quick and easy.

We recommend using a sponge with traditional, non-abrasive cleaning products. You should avoid using scouring powders, abrasive creams, chemical detergents, trichloroethylene, and scouring pads because they will damage the anti-limescale coating.

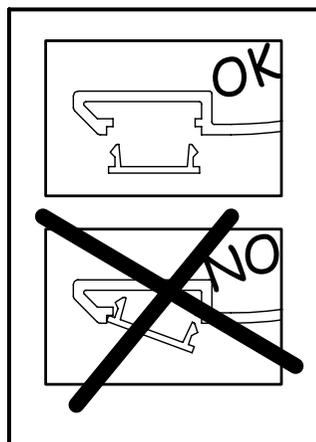

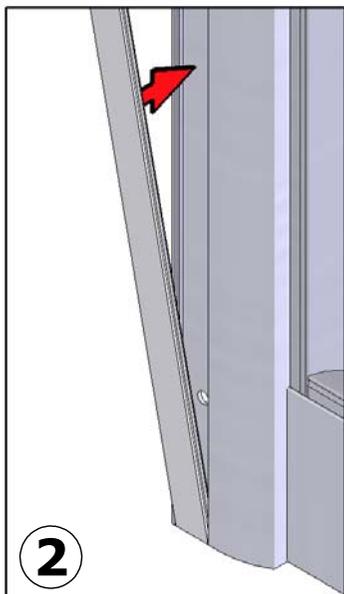

Rinse abundantly with water and wipe with a soft cloth.

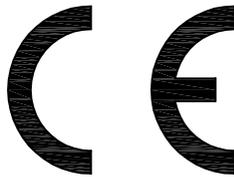

ANNEXE-ANNEX

Comment mettre les pièces de finition facilement.
How to easily add the finishing parts.

Si nécessaire, plier légèrement
l'extrémité.
If necessary, bend slightly at the ends.
