## CONSEILS D'ENTRETIEN

Pour votre confort d'utilisation, les vitrages des parois de douche sont traités avec une protection anticalcaire.

Grâce à ce traitement, l'eau et les salissures adhèrent moins facilement sur le verre. Il est ainsi plus facile et rapide de nettoyer les surfaces vitrées.

Nous recommandons de nettoyer à l'éponge avec des produits classiques de nettoyage non-abrasifs. Vous ne devez pas utiliser de poudre ou de crème abrasives, de détergent chimique, d'alcool trichloréthylène, ou d'éponge abrasive car ils altèrent le traitement de protection anticalcaire.

Rincer abondamment à l'eau claire, essuyer avec un chiffon doux.

AQUAPRODUCTION, Site industriel, F - 44680 Chéméré

12

**EN 14428**

Paroi de douche, fabriquée en verre de silicate  
sodo-calcique de sécurité trempé thermiquement

Aptitude au nettoyage : réussite

Résistance à l'impact/propriétés de fragmentation : réussite

Durée : réussite
